## Automatic Sack Emptiers

**Purpose:-** To empty sacks from 10 kg to 60 kg, totally automatically.  
**Models:-** From 100 to 600 bags per hour. Efficiency to 99.9%.  
**Experience:-** Two decades of manufacturing, designing and supplying systems to suit a wide range of products and bag types.

***Model K400***

**Features:-** Very heavy duty operation. Versions in stainless steel for food and pharmaceutical use.  
Handles paper or plastic bags, even with liners.  
Two large service access doors as standard.  
Fan/ Filter unit to contain dust in the enclosure.  
Integral bag remnant compactor.

**Operation:-** Bags fed into right hand side, pass through knives to trammel drum where separation of product and bag remnant occurs. Remnant is fed into bag compactor and product passes through the vibrating screen to the lower outlet.
